PROJECTS

- **Tomato:A MERN-Stack Food Delivery Platform**
A seamless food delivery app built with the MERN stack, offering a user-friendly interface for browsing menus, placing orders, and real-time tracking. Features include secure authentication, fast performance, and responsive design for all devices.
- **Sky Nova Airlines:React/CSS**
Developed a futuristic, responsive airline reservation web application using React and Vite, with a sleek, modern design and seamless user experience. Implemented fixed navigation, interactive sections for home, about, and contact pages, ensuring optimal performance across devices.
<https://skynovaairlines.netlify.app/>
- **Codesphere Live code editor : Node js/ Socket io**
Developed CodeSphere, an interactive live code editor with real-time collaboration and responsive streamlined user experience with advanced styling and WebSocket integration for seamless updates across multiple clients.
<https://live-code-codesphere.onrender.com/>
- **SmartExpense Pro: HTML/CSS/JAVASCRIPT**
Developed a responsive Expense Tracker application with advanced features such as expense addition, editing, deletion, tracking, and category-wise recommendations, ensuring a professional and user-friendly interface.
